ITEM NAME: Belham Living Delran 15” Square 4-Tier Fountain with Planter Accents
SKU: ALP1469-1
PRE-ASSEMBLY PREPARATION:

- Please read through this instruction before beginning assembly.
- Clear out the space for assembly and lay out all parts based on Parts List below, extra room will allow you to easily determine if all the pieces are present.
- Save all packing materials until assembly is complete to avoid accidentally discarding smaller parts.
- Decide on a suitable location, bearing in mind there may be some splashing when the product is in use.
- Keep small parts and pieces away from children until fully assembled.

### PARTS:

<table>
<thead>
<tr>
<th>Part</th>
<th>Qty</th>
</tr>
</thead>
<tbody>
<tr>
<td>Fountain (A)</td>
<td>1</td>
</tr>
<tr>
<td>Pump (B)</td>
<td>1</td>
</tr>
<tr>
<td>Solar Panel (C)</td>
<td>1</td>
</tr>
</tbody>
</table>
STEP-BY-STEP ASSEMBLY:

1. Place the fountain (A) on a smooth and leveled surface. Connect the vinyl tubing to the pump and adjust the flow control to the max setting. Place the pump in the water reservoir.

2. **STEP 2**: Gently, pour water into the fountain. Be careful not to overflow as this may cause splashing. Make sure the water completely submerges the pump. The water should run clear during operation.

3. **STEP 3**: Plug the pump cord and the light cord into the designated areas of the solar panel as shown in the *Step 5 Diagram* below. In the *Solar Panel Close-Up diagram* below, connect the pump cable (6) first. Next, connect the light cable (7).
Place or insert the solar panel's stake into the ground nearby. Press the power button once to turn the Solar Panel **ON**.

**Note:** Make sure to adjust the panel making a 45 degree angle facing in the direction that captures the most sun throughout the day. Cloudy days or shorter winter days will reduce the amount that the unit will be charged. The orientation of the solar panel will affect the performance of the light. The solar panel should face the center of the range of sunlight.

**Solar Panel Guide:**
1. Solar Panel's Battery Box:
   - Uses four (4) Ni-MH 1.2V1500mah rechargeable batteries.

2. Charging Light:
   - Turns red while the solar panel is charging.
   - Turns green when batteries are fully charged.

3. Working Light:
   - Red light turns on when panel is in use.

4. Power Button:
   - Switch the panel's power **On** and **Off** with one press.
MAINTENANCE AND CARE TIPS FOR OUTDOOR FURNITURE

If you have any questions and/or problems, please contact the retail store you purchased this fountain.

1. **If your pump fails to run**
   - Check the circuit breaker or try a different outlet to make sure the pump is receiving electrical power.
   - Check the pump discharge and tubing for any kinks and/or obstructions
   - Any buildup obstructing the water flow can be flushed with a garden hose
   - Check the rotor by removing the front cover & plate to access the impellor area. Turn the rotor and make sure that the rotor is not jammed or broken

2. **If your pump “spews”**
   - Check the water level to make sure the pump is completely submerged and there if enough water in the basin to operate your fountain. Not having enough water will cause your pump to spew

3. **If your pump is making abnormal loud noises**
   - Disconnect the pump from the electrical power supply and remove the front cover & plate
   - Carefully grip the impeller and gently pull the impeller/rotor assembly out of the pump housing
   - Rinse the impeller/rotor assembly and clean the cavity with clean water. If breakage or damage is found, contact your local retailer for part

**Fountain Care**
- We recommend to use Alpine’s all natural cleansing formula to eliminate foam, lime scale and calcium buildup, fight mineral deposits, leave water crystal clear, help prevent staining, remove organic contaminants and treat discolored water. This formula will help prevent pump damage due to hard water build up.
  i. For small sized fountains holding water up to 7liters of water, we recommend Alpine Item # PPL100
  ii. For larger sized fountains holding water over 7liters of water, we recommend Alpine Item # PPL102
  iii. For more information please visit www.alpine4u.com

**Caution**
- Always unplug the pump from the electrical outlet before cleaning & handling
- Uses with clean water only, do not place the fountain and/or parts in any other liquid.
- Periodically change water & clean the pump to keep free from micro-organisms
- Disconnect and store the unit in a dry place if not in use for an extended period of time
- Do not operate with water above 90°F or 30°C
- Do not lift, carry or pull the pump by the power cord
- Do not exceed the maximum voltage & wattage on transformer
- NEVER LET THE PUMP RUN DRY
