

Product: Bar Stool (C21)

Your purchase and who is C. R. Plastic Products Inc.?

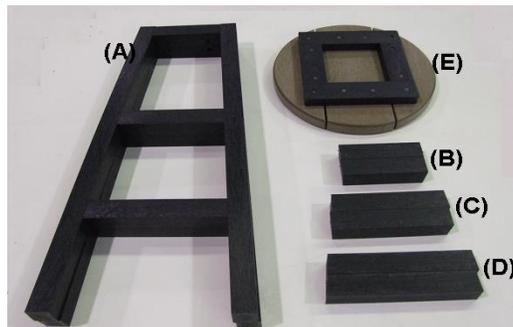

C. R. Plastic Products Inc. is an environmentally conscious Canadian company. Our "Generation Line" of recycled plastic furniture will give you years of comfort, style, and maintenance free enjoyment. You will find your furniture to be waterproof and durable. By choosing this product you are saving generations of trees and are reducing the burden on our landfill sites. Thank you for purchasing from C. R. Plastic Products Inc.

Parts

1. Two sets of legs. (A)
2. Two small stringers (B)
3. Two medium stringers (C)
4. Two long stringers (D)
5. Seat (E)
6. Bag of screws (28 - 2½")

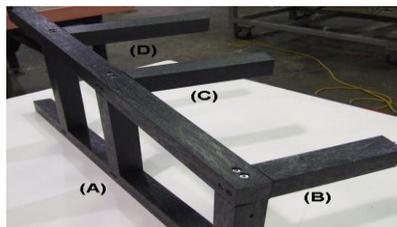

You will need:

1. Drill
2. #2 Robertson (square) or Phillips bit

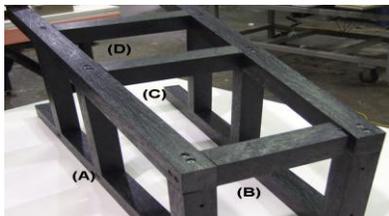

NOTE: The stringers (B, C, D) have angled cuts, the short side faces the seat of the stool.

Step 1: Take one set of legs (A) and the small stringers (B). Hold one stringer flush to the top of the leg. Using the pre-drilled holes on the leg, fasten the stringer with two 2½" screws. Repeat on the other side.

Step 2: Take one of the medium stringers (C) and place it at the middle set of holes. Screw it into place using two 2½" screws. Take one of the long stringers (D) and place it at the two bottom holes. Screw it into place the same way you did above.

Repeat on the other side.

Step 3: Take the second set of legs, and fasten them onto the stringers with six 2½" screws.

Step 4: Place the seat (E) upside down, with the square frame facing up. Place the legs on top of the frame, making sure the holes on the stringers are centered on the frame. Screw the stringers to the frame, using the remaining screws.
