Coral Coast 8 x 11 ft. Aluminum Market Solar Lighted Patio Umbrella

SKU: NING003

ASSEMBLY INSTRUCTIONS: #8580

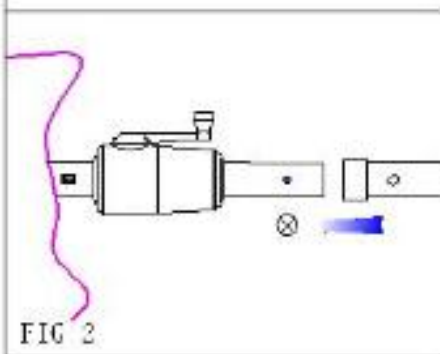

COMPONENTS		
PART	DESCRIPTION	QTY
A	SOLAR PANEL	1
B	UMBRELLA	1
C	POLE	1

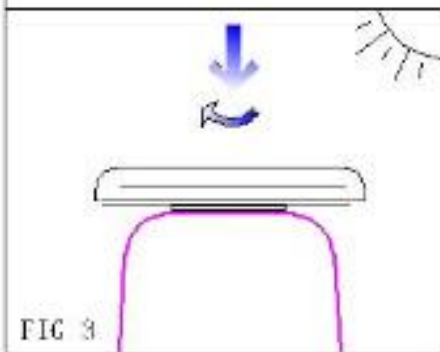

STEP 1:

Screw the solar panel (A) into umbrella (B) referenced in FIG 1 and connect the wire.

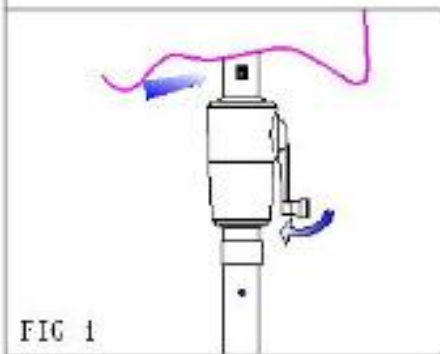

STEP 2:

Attach the lower pole (C) to the upper pole of the umbrella (B) as in FIG 2.

STEP 3:

Put the solar umbrella under the sunshine for 6-8 hours to charge the solar cell battery as shown in FIG. 3. After charging, your solar light umbrella is ready to use.

STEP 4:

Turn the crank handle in clockwise direction to open the umbrella and press the switch to turn the LED light ON and OFF as FIG 4.

## WARNING

This umbrella **must** be used with a weighted umbrella base. Minimum of 60lb weighted base is recommended for free-standing umbrellas. (Not included.)

Do not use this umbrella in high winds or rainy conditions.

## CARE AND MAINTENANCE

Spot clean with mild soap and water as necessary.

Close the umbrella and store inside, when not in use, to prolong your umbrella's usable life.

## TROUBLE SHOOTING

PROBLEM	PROBABLE CAUSE	SOLUTION
LEDs will not light up	Batteries are not completely charged or in need of replacement.	Charge batteries by putting the Solar Panel in direct sunshine for approximately 8-10 hours or replace with new.
	Solar Panel not plugged into the umbrella.	Make sure plug is secure in the Solar Panel Socket (See "Step 1")
	Switch not in the "on" position	Move light switch to the "on" position
	Bad internal connection	Please contact Customer Service before returning to Hayneedle.
