

HAMMOCK STAND

COMPONENTS

- | | |
|--------------------|-----------------|
| 3 poles (2-A, 1-B) | 2 foot brackets |
| 2 pole end caps | 4 foot end caps |
| 2 S-hooks | |

ASSEMBLY

1. Place the foot end caps on the foot brackets. Make sure foot ends are flush to ground.
2. Place one pole between the two foot brackets and insert the foot brackets into the poles, ensuring that the safety clip is secure.
3. Arrange the remaining two poles at each end with the holes facing up.
4. Slide the foot brackets into the poles. Again, make sure the foot brackets are inserted securely. You may want to grasp the end of each pole and shake gently away from you to insure the bracket is properly inserted. **CAUTION:** All foot brackets must be completely inserted into the poles to ensure safety and proper stand measurements.
5. Place the pole end caps (with holes) on the end poles aligning the holes prior to pressing them down on the pole.
6. Insert the s-hooks at each end cap. This is done by inserting the hook perpendicular to the pole and turning it to align with the pole.
7. Using the chain provided on your hammock, hang your hammock tightly on the s-hooks and sit down slowly. This will stretch your hammock out for you to tighten it again. Repeat this until a comfortable height is reached.

8. After any moving or adjusting of your hammock stand, always inspect it to make sure that the joints are properly inserted. Failure to do so may result in the hammock stand collapsing upon use.
9. The round tubing should be fully inserted onto the elbow tubing of the foot base. If the stand is moved, take care not to pull the valco clips out of their groove.
10. Failure to check the stand to ensure that it is properly assembled may result in the hammock stand collapsing upon use.
11. Examine your stand at least every three months to ensure that the pole end caps are still in place and that all welded joints are fully intact.

CAUTION

- ALL POLES MUST BE INSTALLED 2 1/2" ONTO BRACKETS.
- DO NOT PULL OR DRAG YOUR HAMMOCK STAND WHEN MOVING OR ADJUSTING IT.
- DO NOT EXCEED LOAD LIMIT OF 450 LBS OR THE RECOMMENDED LOAD LIMIT OF THE HAMMOCK -- WHICHEVER IS LESS.
- ALWAYS LIFT STAND FROM BOTH SIDES.
- NEVER LET YOUR CHILDREN PLAY IN OR AROUND YOUR HAMMOCK UNATTENDED.
